Affected Products

See Annex

Change Description

Firmware v8.0 caused an issue with Auto White Balance for certain sensors. This new Firmware v8.1 fixes the issue. Only color models are affected. There is no change for mono cameras between Firmware v8.0 and v8.1

Reason for Change

Fixes a bug in the color models

Impact / Possible Successor

Please do not use Firmware v8.0 with the selected models but use v8.1 instead. It guarantees consistent behaviour with previous firmware versions.

First Ship Date

17.05.2022
