Customer Action Request

Allied Vision and our Sales Team will support you best possible through this difficult transition phase by agreeing on long term delivery contract or finding suitable alternatives or substitutes from our existing portfolio.

Please get in contact with an Allied Vision Sales Representative immediately, as prices will continue to increase over time within the last time buy period due to supply of sensors.

Orders for cameras in EOL status are confirmed and processed, depending on component availability. Apart from this, apply our [terms and conditions](#)

Possible Successor

Allied Vision has huge portfolio of CCD and CMOS sensor-based cameras with GigE Vision interface available. Nevertheless, due to the unique KAI-xxxx sensor specifications only partly direct (1-to-1) replacements are available in our current portfolio. Therefore, alternative products listed below can differ in specifications like resolution, optical format, pixel size, or frame rate. Please check our [product webpages](#) for further product details.
