Declaration on banned PFAS

We hereby confirm that we do not procure, process or store any polyfluorinated alkyl substances (PFAS) in our company and that no PFAS are processed in our outsourced production processes (PCB assembly, production of camera housing parts).

We also confirm that our supplier qualification process ensures that we do not procure any items containing substances that are banned in the USA, the EU, China or Singapore. We therefore also rule out the possibility that purchased components of our articles contain PFAS that are banned in the countries in question. This applies to all products manufactured by Allied Vision Technologies GmbH and Allied Vision Technologies Canada Inc. Products for which Allied Vision Technologies GmbH acts as a distributor are the responsibility of the respective manufacturer

PFAS disclosure according to TSCA section 8(a)(7)

We have an ongoing activity to clarify the content of unregulated PFAS in our product. To date, we have screened all cameras of our Alvium and Goldeye product lines and identified the PFAS listed in the table below in our products:

Model ID	Model Name	Substance Name	CAS Number	Concentration
A1F	Alvium G5	Polytetrafluoroethylene (Teflon)	9002-84-0	unknown
G1C	Goldeye G	Polytetrafluoroethylene (Teflon)	9002-84-0	unknown
G1D	Goldeye G Cool	Polytetrafluoroethylene (Teflon)	9002-84-0	unknown
G1E	Goldeye Pro G5	Trifluoroacetic anhydride	407-25-0	unknown

Notes:

- We list all PFAS known to us in the above table, regardless of whether they are named in a regulation (such as TSCA section 8(a)(7)).
- We repeat our screening every six months

Peter Häusler, Product Compliance Officer
