Alecs - The all-in-one machine vision solution

Alecs G1-1242 with Sony IMX545 runs 40 frames per second at 12.4 MP resolution.

Alecs integrates **Alvium CSI-2 technology** with NVIDIA® Jetson Orin NX™ System on Module (SoM) in a robust IP67 housing. Leveraging NVIDIA's computing capabilities and Alvium's comprehensive feature set, this new machine vision system supports a wide range of applications, including complex AI algorithms.

Alecs G1-1242 includes an IP67 lens tube to suit recommended 12 MP lenses.

For seamless software integration, the Board Support Package (BSP) is built on Vimba X and the latest NVIDIA JetPack, offering compatibility with a wide range of popular third-party image processing libraries. Alecs features a recovery mode, ensuring the camera remains in a defined state even in case of errors.

Choose from two access modes:

- **GenICam for CSI-2 Access** directly uses the Alvium CSI-2 driver and CSI-2 transport layer (TL) to control the camera by GenICam features.
- **Video4Linux2 Access** utilizes the established V4L2 API for applications like GStreamer or OpenCV.
